

DOMÉ Construction has an excellent opportunity for a Project Engineer to join our team. The right candidate will be an integral part of a growing, dynamic and challenging environment.

Project Engineers working for Dome Construction Corporation will be given responsibilities and training in specific areas of construction, including Project Management, Estimating, MEP coordination and onsite support of Superintendent.

Project Engineers with Dome will support the Project Manager and Superintendent by facilitating and documenting communication between the Owner, Architect, and subcontractors with the responsibilities of:

### **Technical**

- Contracts
- Scheduling
- Change Orders
- Weekly Construction Meetings
- Assist Superintendent and Project Manager in execution of project
- Financial Reporting
- Document Control
- Procurement
- Detailing
- Coordination
- Subcontractor and vendor shop drawings
- As-built conditions
- Ability to seek and study problems, conflicts, incomplete or ambiguous design information and derive solutions.

### **Personal Skills**

- Ability to work effectively with others.
- Professionalism in dealing with Owners, Architects, Subcontractors, Consultants, Crafts people and Co-Workers.
- Maintain excellent verbal and written communication skills.
- Motivation to continually learn and take on added responsibilities while maintaining a positive attitude. Develop expertise in each skill area exposed to.
- Judgment: Knowing how to respond to a problem in a manner consistent with the Company's primary interest.
- Planning: Looks ahead and organizes activities to stay on top of the project's needs.
- Initiative: Seeks out new opportunities to contribute. Pushes the envelope, raise the bar. Treat each task as an opportunity to excel.
- Ownership: Is totally committed to the success of the project, teammates and the company. Sees the success of project as a reflection on themselves.

The position of Project Engineer is a take off point for college graduates with degrees in Construction Management, Architecture, or Engineering who wish to move forward in their career to become a Project Manager, Estimator, MEP Specialist or Superintendent. Upon developing management skills, a Project Engineer will be assigned small projects under the supervision of a Project Manager.

### **Requirements Include**

- BS from accredited university in Construction Management, Architecture, or related Engineering program
- Knowledge of various project management tools including
- Scheduling
- Sequencing
- Excellent verbal and written communication

### **We Offer**

- Competitive Salary
- Opportunity for advancement
- 401K with employer matching (up to 3%)
- Profit Sharing Plan
- Excellent healthcare, dental and vision benefits
- Section 125 benefits (healthcare, childcare pre-tax reimbursement)

Please submit your resume via e-mail ([contactus@domeconst.com](mailto:contactus@domeconst.com)) and be sure to put PROJECT ENGINEER in the subject line.
